Flood Work Will Need More Money

An appropriation of \$3,700,000 by the 1957 State Legislature to the Central and Southern Florida Flood Control District will enable the district to participate in federal appropriations anticipated during the next two years, according to an FCD announcement today.

It was stated that, "As the project continues to prove its value, there is an increasing probability that the amount of Federal funds earmarked for it will be stepped up to allow a faster rate of construction."

The State appropriation to the FCD budget pays for water storage lands, certain relocations, and a cash contribution of 15 percent of construction costs.

Among projects slated for new starts in the coming fiscal year are the levee bounding the western side of conservation area No. 2 and construction of improvements to the Harney Pond and Indian Prairie canals. In addition, enlargement of Biscayne Canal is contemplated and work in the upper and lower Kissimmee River basin is planned.

The FCD has asked the Federal government for \$45 million for the next fiscal year and \$25 million a year thereafter until the project is completed.

The State of Florida must be in a position during the next two year period to meet its share of the costs in the event Congress appropriates annually the funds requested.

Cinematic Chatter

By Malcolm Millar

Hello everybody! Meet Hollywood's foremost award-winning actor, Thomas Mitchell. Known throughout the theatrical profession as an actor's actor, Mitchell is an established public favorite in every entertainment medium, but in the amusement trade his position is unique. Mitchell, the records show, has been handed every acting award in which the voting has been done by people within show business. He was the winner of Hollywood's coveted Academy of Motion Pictures Arts and Sciences Award. He won a Television Academy award. Another tribute was the Antoinette Perry and Donaldson award and citation for stage work. Most memorable, of course, was Mitchell's winning of the Roy Cooper Guild for "Little Accident," which he authored and in which he played. Television seems to have adopted Mitchell. He has been in constant demand since the advent of video. But he contends he would rather work in motion pictures, that is, when a good "Mitchell" type of role comes along. See you at the movies—Mal.

OPERATION BIG SWITCH

for Better Florida Farming

Florida farmers are switching more and more to electricity to speed work, improve efficiency, increase profits. For instance, many dairy farmers are now installing lights in the floors of milking stalls to provide better illumination during milking. Makes inspecting for sanitation easier, speeds milking by hand or machine. Look around your farm... discover ways electricity can make your farming more efficient.

Electricity lightens the work of the farmer's wife, too. For example, heating water electrically is cleaner, safer, and economical in an all-electric kitchen-laundry in the home or in town.

Pick your savings target and shoot straight for it!

A home . . . financial security . . . a business of your own. Important savings targets like these cost money—a substantial sum—and more than most of us have. But here's a sure way for you to score a bull's-eye and walk off with the big prize you want.

The secret of saving is system. And the simplest, most automatic saving system ever devised is the Payroll Savings Plan. Best of all, you do more than save through Payroll Savings. You invest your money, too, and make it grow. Here's how it works:

Tell your company pay office how much you want to save each week. Then each pay period that amount will be put aside for you before you have a chance to spend it. Your money will go automatically into U. S. Series E Savings Bonds.

Because Savings Bonds earn good interest—3% compounded semiannually when held to maturity (9 years and 8 months)—they're soon worth much more than you've invested in them. And your Bonds will continue to pay this same good interest as long as 19 years and 8 months. That means a return of up to 80% more than you originally paid.

And remember this. There's no guesswork or chance about the Payroll Savings Plan. It's absolutely safe and sure. Invest just \$7.50 a week. In 5 years you'll have Savings Bonds worth \$2053 in cash; in 10 years, \$4448.

Even if you've never been able to save before, this plan is guaranteed to work for you. So sign up today for Payroll Savings where you work—or invest in Bonds regularly where you bank.

For the big things in your life, be ready with U. S. Savings Bonds

Double Pleasure

I just got back from Tallahassee. It's about as pretty a state capitol as any in the U. S. and I've seen most of them. I called in on some of our friends to find out what was new. I did find out that it takes an awful lot of money to run this big state of ours. I guess you're wondering the same as I was, where does the money all come from. Well, I spent a very pleasant evening with one of those fellows in the know. We were drinking a friendly glass of beer and he said, "You know something, Joe — this beer we're drinking is really double pleasure." I had to ask what he meant and he said,

"Well, this beer brings pleasure to you and me just 'cause we enjoy it, but did you ever stop to think that it brings pleasure to people that don't drink it?" Right there I listened hard. "You see, Joe, every glass of beer helps to pay for our government. Why last year alone the state tax on beer in Florida was over sixteen million dollars." Well — from where I'm sittin', that's a lot of pleasure ... double pleasure!

Scriptural selections in the Lesson—Sermon on "Matter" will include the following from Isaiah (33:20, 22): "Look upon Zion, the city of our solemnities: thine eyes shall see Jerusalem a quiet habitation a tabernacle that shall not be taken down; not one of the stakes thereof shall ever be removed, neither shall any of the cords thereof be broken... For the Lord is our Judge, the Lord is our law, the Lord is our king; he will save us."

*Uncle Sam made the bonds you own
an even better bargain!*

Now your maturing Series E Bonds can earn interest 10 more years at 3%

PRESENT TREASURY REGULATIONS make it possible for you to collect a return of as much as 80% on the Series E Savings Bonds you already own!

For now those Bonds which you invested in 10 years ago can go right on earning interest for ten more years without your doing a thing about it! That is true not only of the Bonds which you have held for ten years, but any other Series E Bonds which you have invested in in the meantime. And any Series E Bonds which you obtain now will also enjoy the extended earning period. They will start earning interest sooner and mature earlier, too, paying 3%, compounded semiannually.

The Bond you got for \$18.75 can now pay you \$33.67 ... a \$37.50 Bond will be worth \$67.34 ... and so on.

Of course, any Series E Bond may still be redeemed at any time after you have held it for two months. But, like any other form of saving, your Bonds will mean a great deal

more to you if you can hold on to them.

Are you one of the millions of Americans who are saving regularly with Savings Bonds through the Payroll Savings Plan? If you're not, why not start now? Invest regularly in Bonds through the Payroll Savings Plan where you work. Ask your pay office to save as little as 25c a week for you, or as much as you are able.

If you can save just \$5 a week regularly through the Plan, in five years you will have \$1,367.90 ... in 9 years and 8 months, you'll have \$2,850.70 ... and in 19 years and 8 months, \$6,872.45! This Plan is one sure way to save because it saves something out of every check before you have a chance to spend it.

So join the Payroll Savings Plan where you work today. Or, if you are self-employed, start the Bond-A-Month Plan where you bank. It's safe, it's sure, it's automatic. And you will be helping yourself and your country!

If you want to be paid
your interest as current income—
invest in 3% Series H

If you want a good, sound investment which pays you your interest by check every six months, ask at your bank about United States Government Series H Bonds. Series H is a new current income Bond available in denominations of \$500 to \$10,000. Redeemable at par after 6 months and on 30 days' notice. Matures in 9 years and 6 months and pays an average 3% interest per annum if held to maturity. Interest paid semiannually by Treasury check. Series H may be purchased at any bank, annual limit \$20,000.

Now even better! Invest more in Savings Bonds!
